DESIGN CONCEPT 02 / PROFILE DRAFT

A clear focus. A connected business.

Techno Bulk Holdings (Pty) Ltd brings together exporting, storage and handling services at Durban harbour. Established in 2015, the company connects suppliers and end users through a practical focus on commodities and the movement of cargo.

Port photography from the supplied corporate profile

Our business

Our vision is to be the strongest link between suppliers and the end user. That ambition gives the business its direction, from the first commercial enquiry through to the storage and handling requirements around an export movement.

Our perspective

Our service focus sits at the point where product requirements, commercial terms and physical cargo arrangements meet. A useful conversation begins with the commodity, quantity, destination and timing, then identifies the storage and handling arrangements needed for the transaction.

The capability behind the name.

01 Export services

Commodities for the export market

Our export service portfolio includes coal, iron ore, chrome and manganese. Each enquiry needs its own product specification and commercial scope. Origin, quantity, destination, inspection requirements and trade terms should be established for the proposed transaction.

- + Product and specification
- + Quantity and delivery programme
- + Destination and trade terms

02 Storage

Space planned around the cargo

Storage forms part of our Durban harbour service focus. The nature of the cargo, the quantity and the period it will remain in storage are central to the brief. Arrival and collection dates, packaging, access and any special storage requirements should be identified at the outset.

- + Cargo type and packaging
- + Expected storage period
- + Arrival and collection dates

03 Handling

The connection between storage and movement

Handling requirements need to be considered alongside the commodity and movement schedule. A clear brief identifies the loading or off-loading activity, the cargo presentation and the points at which responsibility passes between the parties. The agreed quotation should define the actual service scope.

- + Loading or off-loading scope
- + Cargo presentation and access
- + Responsibilities and timing

A better brief. A clearer next step.

Coal

Coal, including RB1, RB2 and RB3, forms part of our export portfolio. Confirm the grade, analysis, quantity and destination for the proposed shipment.

Iron ore

Iron ore forms part of our export portfolio. Identify the required specification, shipment quantity, destination and commercial terms for your enquiry.

Chrome

Chrome is included in our export portfolio. State the material requirement, analysis or specification, quantity and intended destination.

Manganese

Manganese is included in our export portfolio. Bring the product specification, quantity and proposed shipment timing into the discussion.

Information for an export enquiry

01 COMMODITY

Product name, grade and required specification.

02 QUANTITY

Total quantity and any shipment schedule.

03 DESTINATION

Destination country, port or delivery point.

04 TRADE TERMS

Proposed pricing basis and responsibilities.

05 HARBOUR SERVICES

Storage period and handling requirements.

06 DOCUMENTS

Specification, inspection or other required supporting information.

Product availability, specifications, inspection requirements, storage and handling scope, and commercial terms are agreed for each transaction. Please include the information above when requesting a quotation.

A business has a wider responsibility.

Our business principles include reliability, customer focus, efficient use of resources and a responsible attitude towards socio-economic upliftment. These principles shape the relationships we aim to build with customers and the wider community.

Integrity

Consistent principles and clear communication form the basis of business relationships.

Efficiency

Careful use of time and resources supports a practical response to each requirement.

Solution driven

The focus stays on understanding the requirement and defining a workable response.

Respect

Professional relationships begin with respect for the people and businesses involved.

Community priorities

Employment

Creating employment opportunities for communities around the business, with a particular focus on the growth and development of young people.

Education

Supporting skills development and preparation for work, with an emphasis on helping people build practical capabilities.

Sport

Encouraging discipline, teamwork and constructive opportunities for young people through sport.

Social and health

Supporting community development and social wellness as part of a responsible approach to business.

These priorities are retained from the supplied Holdings profile. Specific projects, beneficiaries and current programme details can be added once confirmed.

Four businesses. Distinct capabilities.

The Technobulk identity brings these businesses together while keeping the focus of each company clear.

Exports, storage and handling at Durban harbour.

A mining business focused on coal and chrome.

Warehousing at Durban harbour.

G5 and G7 materials in Richards Bay.
